ISSUE 5 – 2013 – EXPANDING HORIZONS

Introducing Enkoflex and Enkoform VMK, the newly developed product range from ULMA. Since we have seen ULMA buy out ALPI formwork (Italy) they have intergrated Alp's world famous invention the "Mekano Soldier" into these new systems for fair faced finishes and suspended ceilings.

This year hirestocks have reached £1.7 million and continue to grow at a sustainable but good pace, organically.

WOODHOUSE MILL STW

AREA FORMED: 40 METRE DIAMETER TANK

LOCATION: SHEFFIELD

This repeat user of BIRA had to construct a 4.5 metre high tank, utilising their existing own BIRA with additional material supplied by Adapt Formwork, 40 metres diameter constructed in 4 pours.

CRANKLEY POINT STW

FORMWORK SYSTEM: BIRA

LOCATION: NOTTINGHAM

BIRA was radiused in 2 lifts to form this Sludge Digester Tank as part of the AMP 5 Framework. Due to the 1100 wall thickness timber infills were used in between the BIRA to form the shape. Quality F4 finishes every time using BIRA.

SCARBOROUGH STW

CSO CHAMBER

CLIENT: YORKSHIRE WATER

This sewerage works as part of the Yorkshire Water AMP 5 programme saw this 5 metre high CSO chamber along with a 20 metre deep pit constructed in 5 lifts in the height.

Quality formwork was provided as required and the results should speak for themselves.
